SUMMARY

Senior Product Designer with 17 years of experience in global consultancies and fintechs, specializing in transforming complex business problems into scalable digital products. Proven track record at companies like Thoughtworks and Pravalier, combining technical leadership with a user-centered approach to drive high-impact results and operational efficiency.

Key Achievements:

- Spearheaded the creation of the corporate Design System at Pravalier from scratch, establishing a reusable component library that increased team delivery speed and ensured visual consistency across multiple squads.
- Designed the Vector app for TARGET/BUNGE, digitalizing the agricultural freight process and achieving a 65% reduction in physical service queues through a user-centered operational strategy.
- Led the strategic redesign of the Holmes product, implementing a new information architecture and style guide that modernized the interface and significantly increased user engagement.

PROFESSIONAL EXPERIENCE

Thoughtworks

Senior Product Designer

05/2024 – 05/2026 • Remote

- Acted as a strategic UX/UI consultant for high-complexity global projects, leading Product Discovery initiatives to map opportunities for major loyalty and aviation clients.
- Designed end-to-end user journeys for loyalty platforms, eliminating critical friction points and optimizing the navigation experience for millions of users.
- Developed the strategic design for the unification of distinct digital ecosystems, ensuring brand consistency and interface scalability at a corporate level.
- Created high-fidelity interactive prototypes for MVP concept validation, reducing approval time with senior stakeholders and accelerating the go-to-market cycle.
- Implemented AI-driven product design methodologies to optimize qualitative research synthesis and automate design component creation in Figma.

Pravalier

Senior Product Designer

02/2022 – 02/2024 • São Paulo, Brazil

- Established the design culture and UX practices from the ground up, serving as a technical reference for multidisciplinary squads and product leadership.

- Directed the end-to-end product design cycle for financial products, from initial research and hypothesis validation to technical handoff and success metric tracking.
- Structured the corporate Design System, creating a solid foundation of components that ensured visual integrity across different fintech products and platforms.
- Conducted usability tests and user interviews to ground product decisions in real data, reducing development uncertainty for new financial features.
- Optimized critical student loan application flows, simplifying complex 12-step journeys into seamless experiences focused on conversion and user impact.

Dotz Inc.

Senior UX Designer

09/2021 – 02/2022 • São Paulo, Brazil

- Developed design strategies for user activation and retention on loyalty platforms, using data analysis to personalize the cashback experience.
- Executed in-depth user research to validate design solutions for the "Desejo Ourocard" product, aligning Banco do Brasil's business expectations with user needs.
- Maintained and evolved the DHARMA Design System, ensuring all new interfaces followed established usability and accessibility standards.
- Performed rigorous usability tests that resulted in a measurable increase in the platform's NPS, improving the perceived value of digital services.
- Collaborated with data and marketing teams to create visually consistent and conversion-oriented loyalty campaigns.

Holmes

Senior Product Designer

07/2020 – 09/2021 • São Paulo, Brazil

- Managed the complete redesign of the process management platform, focusing on interface modernization and the simplification of operational workflows.
- Created navigable prototypes for complex systemic flows, allowing stakeholders to visualize and validate design solutions before technical implementation.
- Implemented improvements in microcopy and information architecture, making the system more intuitive and reducing the cognitive load for end-users.
- Aligned business requirements with user needs through facilitation workshops, ensuring the final product delivered real value to the organization.
- Supported the engineering team in implementing the new Style Guide, ensuring visual fidelity and front-end quality across all system screens.

redspark

Senior UX Designer

03/2020 – 07/2020 • São Paulo, Brazil

- Designed high-impact digital solutions for the public and educational sectors, focusing on accessibility and clarity for large-scale infrastructure projects.

- Conducted Discovery and high-fidelity prototyping for new RNP products, navigating complex institutional processes and multiple government stakeholders.
- Facilitated the adoption of the "Ciência na Escola" program through a simplified interface that allowed municipal managers to handle educational projects efficiently.
- Performed user research in government contexts to ground design decisions that directly impacted the usability of digital public services.
- Collaborated on the product vision for social impact initiatives, transforming complex requirements into simple and functional user journeys.

Sabion Digital

UX Designer

09/2019 – 03/2020 • Rio de Janeiro, Brazil

- Optimized the digital reimbursement flow for Bradesco Seguros, reducing user errors and abandonment rates through targeted UX improvements.
- Developed interactive prototypes for insurance service validation, from initial journey mapping to final technical handoff.
- Simplified digital service processes, decreasing friction and improving the policyholder journey across self-service and support channels.
- Documented user guidance processes to increase customer autonomy and clarity during the digital insurance journey.
- Acted as an interface between the client and development teams, ensuring design deliveries were technically feasible and brand-compliant.

TARGET BRASIL LTDA

Product Designer

04/2019 – 09/2019 • São Paulo, Brazil

- Led the design of the Vector app for BUNGE, creating an innovative digital solution for the agricultural freight and logistics market.
- Conducted field research with drivers and managers to map the freight journey and identify critical bottlenecks in the manual hiring process.
- Digitalized the operational workflow of grain transportation, delivering a platform that increased visibility and efficiency for the company's logistics operations.
- Reduced physical service queue times by 65% by implementing check-in and freight management features directly in the mobile application.
- Managed strategic alignment between operations and technology to ensure the successful launch of the MVP in a traditionally analog market.

HiperStream Inc.

UX/UI Designer

07/2016 – 08/2018 • Rio de Janeiro, Brazil

- Managed the design team in creating internal tools and portals for the insurance sector, focusing on the modernization of legacy processes.

- Designed the sales CRM for insurance brokers, structuring a management tool that did not previously exist and organizing the sales force.
- Digitalized the DARF submission process for Generali policyholders, eliminating manual errors and automating a previously bureaucratic task.
- Developed interactive prototypes for internal operational flows, ensuring that digital tools increased employee productivity and data accuracy.
- Acted as a bridge between business needs and technical feasibility, coordinating with stakeholders to deliver efficient interface solutions.

Wdev Solucoes Em Tecnologia

Full UX/UI Designer

09/2013 – 03/2016 • Rio de Janeiro, Brazil

- Developed high-fidelity prototypes for major insurance companies, focusing on policy management systems and customer service portals.
- Created a strategic Proof of Concept (POC) that enabled the company's first contract with IRB (Instituto de Resseguros do Brasil).
- Implemented interactive interfaces using front-end technologies to ensure visual and functional precision in delivered design projects.
- Collaborated with systems analysts to translate complex business requirements into clear information architectures and intuitive navigation flows.
- Performed evolutionary maintenance on insurance portals, applying usability improvements based on technical and user feedback.

Metatron

Mid-level Designer

08/2010 – 08/2013 • Rio de Janeiro, Brazil

- Developed digital solutions for large-scale clients such as Oi, GS1 Brasil, and Grupo EBX, focusing on corporate portals and management systems.
- Created user-centered interfaces using front-end technologies to ensure rich and interactive experiences across different browsers.
- Participated in the full design cycle of digital products, from visual conception to final technical delivery and implementation support.
- Collaborated on the creation of complex corporate portals, focusing on content organization and ease of navigation for the end-user.
- Developed custom layouts that respected the visual identities of established brands in the national market.

Stefanini

Web Designer

08/2009 – 08/2010 • Rio de Janeiro, Brazil

- Developed complex portals and systems using CMS tools, providing strategic services for the Petrobras account.

- Led the design and development of the PROMINP portal for the Federal Government, a high-profile national infrastructure project.
- Created navigable prototypes for internal management systems, facilitating the visualization of workflows for users.
- Implemented layouts focused on accessibility and government web standards, ensuring inclusion for all citizen profiles.
- Collaborated with systems analysts to translate technical requirements into functional and intuitive interfaces for the oil and gas sector.

EDUCATION

- Bachelor's Degree in Information Technology - Centro Universitário da Cidade (UNIVERCIDADE) • Period: 2000 - 2005.
- Digital Product Design Specialization - TERA • Period: 2025 - 2026.
- Creative Process Facilitation - DTG Brasil • Period: 2022 - 2022.

CERTIFICATIONS & COURSES

- Design System Specialist - Meiuca • 12/2021 - 12/2021.
- Product Design 2.0 - BTX Consultoria em Tecnologia • 06/2023 - 06/2023.
- UX Design and Research Essential - Canal UXNOW • 04/2024 - 04/2024.
- Design Ops Strategy - How Bootcamps • 10/2022 - 10/2022.
- Intuitive Pixel - Intuitive Pixel • 04/2024 - 04/2024.
- Presentations - BTX Consultoria em Tecnologia • 03/2024 - 03/2024.
- Creative Process Facilitation - DTG Brasil • 08/2022 - 08/2022.

LANGUAGES

- Portuguese - Native.
- English - Intermediate.
- Spanish - Intermediate.

SKILLS & TOOLS

Product Design, UX Strategy, Design Systems, User Research, Product Discovery, Figma, Adobe XD, AI-Applied Design, HTML/CSS, Technical Leadership, Stakeholder Management.

FEATURED PROJECTS

- B2B Super App MVP: Led the design for an auto parts network with 36 branches, using AI for research synthesis and high-fidelity prototype validation.
- Pravalier Redesign: Simplified the student loan application journey from 12 steps to a continuous, conversion-optimized flow, integrating complex business rules.
- Vector App (BUNGE): Created a digital solution for agricultural freight from scratch, eliminating manual processes and reducing operational queues by 65%.
- Insurance CRM: Developed a first-of-its-kind management tool for insurance brokers, structuring the sales force and organizing strategic customer data.
